

# SPACE TEAMS

## Countdown to Launch Checklist

- ☐ [Create](#) Your Individual Dashboard Account
- ☐ [Set up](#) Your Team
- ☐ [Create](#) Your Learning Platform Account
- ☐ [Test](#) Your Computer Hardware
- ☐ [Download](#) the SpaceCRAFT Application

### Create your Dashboard Account

The Dashboard Account is what you will use to login to both the [dashboard website](#) and the SpaceCRAFT application. The [dashboard website](#) is where you can view and communicate with your teams, access activity leaderboards, and send in help tickets to Space Teams Support.

### Set up your team

If you do not know what team you would like to be on, do not worry! Teams will be assigned automatically before the competition starts for those not already on a team by Day 1 of the program. We recommend team sizes of 4 students.

### Create your Learning Platform Account

The [Learning Platform](#) is where you will access webcasts/recordings, video lessons, video tutorials, guest speaker events, and more!

### Test your Computer Hardware

We need to make sure your computer meets the hardware standards in order to run SpaceCRAFT smoothly. This test is done through GeekBench 5 and when finished, will provide you with a number indicating your computer performance!

### Download the SpaceCRAFT application

The software will be available on the dashboard website 24 hours prior to the start of the program. This is the software you will use to collaborate with your team to accomplish each day's challenge. Currently, you need a **Windows Operating System** to run the SpaceCRAFT application.

If you have any questions, [reach out to Space Teams Support](#) for help!
